

1. Go to the toolbar at the top of the screen.
2. Click on the Airport option (the one shaped like a fan with radio waves).
3. From the pulldown menu, choose "Join Other Network."
4. For Network Name, you'll type in the SSID: ACofI_WireLess
5. Under the Security pulldown, select LEAP.
6. Type in your school username, in the format of john.doe.
7. Type in your campus password, which is the one you use to log on to school computers.
8. If that doesn't work, try again after logging out and back in or restarting. This can help. If it still doesn't work, either your location isn't getting a good signal or you'll need to consult with ResNet.
9. You may have to enter this information each time you want to use wireless, depending on your system and how strong the signal is.

That should be it! Good luck!
